

- NOTES**
1. Cushions will be installed using bolt down methods. This means installation is quicker, reducing costs and traffic disruption.
 2. Cushions to be set at a height no greater than 0.75mm.
 3. Cushion locations are not exact and will be confirmed if the scheme proceeds. However, large positional changes will not be possible due to limits on carriageway space.
 4. Distance between humps to be approximately 70m - 130m for effective speed management.
