Derbyshire Joint
Adult Autism Strategy Refresh
2017-2020

DCC
1. What are the things we need to achieve?

The Autism act, Department of Health national strategy and associated statutory guidance provides the strategic framework for improvement across all services to support people with an autistic spectrum condition. Whilst the statutory guidance is clear on the requirements that both NHS bodies and Local Authorities must achieve, it also specifies what NHS bodies and Local authorities should achieve and how public sector bodies should work in partnership to support people with an autistic spectrum condition to lead a fulfilling and rewarding life.

The rights of people with autistic spectrum conditions are enshrined within the Equality Act 2010 and the Human Rights Act (1998).

The Care Act (2014) places a duty on Local Authorities to prevent, reduce or delay the need for care and support and to ensure that anybody, including a carer, who appears to need care or support is entitled to an assessment, which must focus on outcomes important to the individual as detailed within statutory regulations.

The transforming care programme has been established to improve the quality of support provided to people with a learning disability and/or autism who display behaviour that challenges.

The accessible communication standards aims to make sure that people who have a disability, impairment or sensory loss are provided with information that they can easily understand and receive support so they can communicate effectively with health and social care services.

All Local Authorities have overarching duties to safeguard both children and vulnerable adults from abuse.

NICE have produced clinical guidance and quality standards relating to the assessment and management of autistic spectrum conditions in adults.

Many professional bodies have created and published standards with which their members should abide. These include the Royal College of Psychiatrists, British Psychology society, Royal College of General Practitioner, Royal College of Nursing and the Social Care Institute of Excellence.
2. What do we know about how well we are progressing?

The Autism Act requires the Department of Health to undertake regular assessment of the progress of local areas in implementing the actions required. This is achieved through a Self-Assessment return co-ordinated by Local Authorities but including NHS and public sector partners. A summary of the local findings are provided on the following page.

The Derbyshire Autism needs assessment recommended that the local system look to develop a joint care pathway across health and social care; the pathway should take account of training needs of staff and carers, ensure services make reasonable adjustments and adaptations and effectively plan capacity levels to meet the expected rise in demand. It also recommended that an action plan and monitoring mechanisms are developed to support the delivery.

The results of the survey identified the following priorities for people with autism living in Derbyshire; help with meeting friends, communication, managing behaviour, getting a buddy or volunteering, finding groups and joining activities.

The Autism leads in Derbyshire and co-chair of the Autism Partnership Board regularly meet self-advocates and collate the themes including good practice and areas for improvement. The main themes relate to length of time between referral and diagnosis and lack of post diagnostic support.

Care and Treatment reviews of people admitted for mental health acute care or receiving crisis services in the community has highlighted the need for more effective pro-active care planning enhanced workforce skills, reasonable adjustments and housing support needs.

National awareness campaigns and media focus has had a positive effect on reducing stigma relating to ASD, this has encouraged more people to seek both a diagnosis and support services to meet their needs. Since 2012 the number of adults referred for an ASD assessment has increased substantially (>50% increase) and the number of people meeting social care eligibility criteria with an autistic spectrum condition has increased 25% since 2014.

The Derbyshire Autism Partnership Board have highlighted the need for further work with Department of Work and Pensions and Job Centre colleagues to enable an increase in people getting into and maintaining employment.
3. How well have we done in meeting the requirements of the Autism Statutory Guidance?

The table below provides a summary of the submissions made for the populations of Derbyshire County and Derby City. The table is a quick visual guide of the responses provided to the questions which included a self-assessed RAG rating. The self assessment reports provide much greater detail relating to all of the sections detailed below and the progress made by each Local authority area in achieving the requirements of the Autism Act and subsequent strategic requirements and statutory guidance. The full report can be found at [https://www.gov.uk/government/publications/autism-self-assessment-framework-exercise](https://www.gov.uk/government/publications/autism-self-assessment-framework-exercise)

The Self Assessment return highlights the need for improvement on access to training for both specialist staff (social workers and specialist health care) and mainstream services (all care provision including healthcare providers, partner organisations including DWP (Job Centre+), Borough Council departments (housing and leisure services) courts and probation service and Derbyshire Constabulary). The report also highlights that improvements are required in the delivery of the diagnostic pathway in relation to reduction in waiting times and provision of post-diagnostic specialist support.

Further work is required in relation to the provision of care and support and ensuring equitable access to care assessments, raising awareness across care agencies to ensure that reasonable adjustments and adaptations are made and stimulating the market to provide greater levels of choice over specialist support.

Improvement in accommodation support is required from Derbyshire County Council which is based on the partnership between the Local Authority and Borough Councils.

Both local authorities have dedicated employment support for people with disabilities however further work is required to improve support for people with autism.

Working relationships have been established with partner agencies across the Criminal Justice System however further work is required to support increased understanding and reasonable adjustments/adaptations to support people.
4. What are our priorities for the next 3 years?

Collating the requirements from the statutory guidance and the themes from the local findings the following areas have been highlighted as a priority for the Derbyshire Adult Autism Programme.

For both individuals with an autistic spectrum condition; and their immediate support network, along with paid carers and health providers there is a need to **improve access to advice information and training across Derbyshire**. The communication methods and information needs will vary from one person to the next so we need to develop many different ways of providing the information including booklets, videos, on-line learning modules and face to face learning.

Both the Derbyshire survey and Self-Assessment results highlight a need to increase access to support to **enable people to live well** within their homes and communities. We want to create a system that promotes empowerment and self-management at it’s core and provides rapid access to advice, guidance and care provision when needed.

We know that there are times when some people need expert advice from people with greater levels of knowledge and skills therefore we want to **improve access to specialist support**. We understand that this needs to be available not only in times of crisis (when things are going wrong and support is required urgently) but also to assist with development of personal strategies to help people cope with challenging situations, and to support the development of effective care plans which capture what is important to people and how services will work together.

In Derbyshire there are two Adult Autism Assessment services able to provide a diagnosis however the waiting times are longer than we would like. We know we need to **improve access to diagnostics** to ensure that people get help to understand themselves and their condition better, that access routes are opened up to ensure reasonable adjustments are made and interventions are adapted as required.

We know that life’s transitions are hard for everyone but can be extremely difficult for people with an autistic spectrum condition. We want to help prepare individuals, families and services for the unique challenges that **preparing for adulthood** can bring for people, which includes navigating relationships and sexuality, moving into a home of your own, seeking further skills and employment, becoming financially independent and how to build a network of support to enable people to cope with these challenges.
5. How are we going to achieve them?

1) We will ensure that all organisations are aware of their duties to provide autism awareness training to all staff and we will work with national and local campaigns to increase awareness across our communities.

2) We will work with health and social care organisations to ensure that staff receive the relevant training and skills to deliver their role.

3) We will develop and publish information booklets and support packs.

4) We will work across the system to link people together and develop networks of support.

5) We will review care and support provision to ensure that the interventions offered are evidence based and provide good value for the individual and the Derbyshire £.

6) We will provide advice and guidance to individuals and their immediate support network to promote and encourage self-management strategies and techniques.

7) We will work with partner agencies to promote employment support for both the potential employee and employer.

8) We will support the development of specialist assessment skills across the relevant agencies and organisations.

9) We will work with our crisis response services to develop specialist skills to support people with ASD and ensure that rapid access to appropriate environments for assessment and treatment is provided.

10) We will work with the providers of community mental health support (including IAPT services) to ensure the interventions provided are adapted and that reasonable adjustments are made to the physical environment and communication methods.

11) We will work with our providers of adult autism assessment to reduce the waiting times between referral and assessment.

12) We will smooth the transition between children’s and adult services for those individuals receiving care and support and provide advice and guidance for those individuals whose needs are not as complex however may find the transition challenging.

13) We will work across agencies to support people who have offended and reduce re-offending rates.
6. What are the responsibilities for key health and social care organisations?

7. What does this mean for Derby City Council?

1) We will provide autism awareness training for all staff across all council divisions and encourage all managers to ensure their staff are supported to complete the course.

2) We will provide access to role specific training for all our staff providing frontline services to increase understanding and skills to support people with autism in line with statutory guidance.

3) We will develop information and support packs to raise awareness and understanding of autism and associated challenges and distribute these to the population that we serve and our partner organisations.

4) We will seek to work closely across the Derby community to support and encourage the development of a Derby City Autism Champions network to enable knowledge sharing.

5) We will ensure all of our universally accessed services are inclusive for people with autism ensuring reasonable adjustments are made.

6) We will work with our voluntary sector, community and social enterprise partners to raise awareness of autism, provide information and support packs to increase skills and knowledge and encourage the development of autism friendly service support.

7) We will signpost people with autism (direct payments or self funding) to a self-management education programme to support people living with autism; and their immediate support network, to understand their condition better.

8) We will ensure our recruitment processes are autism friendly and ensure that reasonable adjustments are made.

9) We will provide support for our staff members living with autism to ensure their work environment is reasonably adjusted and provide support to managers and immediate work colleagues to increase understanding of autism.

10) We will work with corporate and community employment leads to support access to employment opportunities.

11) We will ensure all of our social work teams receive the appropriate training to enable them to undertake effective Autism Act and Care Act assessments for people living with autism and their immediate support network.

12) We will work with our partners within health and the voluntary, community and social enterprise sector to support people with autism understanding their Autism Act rights to receive a Care Act assessment and ensure the referral process is inclusive for people living with autism.

13) We will work closely with our partners in health and the criminal justice system to support people living with autism who find themselves in a crisis situation and will work effectively to provide support to resolve the crisis.

14) We will raise awareness of the impact of autism on everyday life and the increased risk of associated common physical mental health conditions.

15) We will share information across social care and universal access services regarding the referral process to receive an autism assessment so that people are supported to understand their options.

16) As part of the ‘preparing for adulthood’ pathway we will consider the needs of young people with autism not previously known to the children’s service (without an active SEND, GRIP or EHC) and ensure that easily accessible information is provided regarding prevention services and the formal and informal support they can receive.

17) We will work with city and county CYP partners to support SEND autism specific developments.

18) Our Youth Offending Partnership will develop specialist knowledge and skills to support people living with autism in the criminal justice system, and work with partners across agencies to ensure reasonable adjustments are made.
8. How will we know when we have achieved them?

- **Timely information and advice from one single point of access**
- **Improved access to community care assessments**
- **Increased social skills and understanding of behaviours**
- **Increased independence and self-directed support**
- **Increased understanding and management of risk**
- **Improved access to education and employment**
- **Improved pre-assessment and post diagnostic support**
- **Reduced levels of anxiety and depression**
- **Reduced assessment times**
- **Improved understanding of meltdown triggers**

People will know where to go to get access to advice and information and it will be provided 24/7. People will be informed of their rights to receive a community care assessment and the assessment process will be sensitive to identify the social as well as care needs.

People will be supported to understand the impact of their behaviour on others (this will include supporting people with autism understanding the impact their behaviour has on people without autism as much as people without autism understanding the impact of their behaviours on people living with autism).

People will be supported to live the life they want to lead, in their community with knowledge and skills to enable them to build personal resilience a strong support network.

People will have a better understanding of the risks (both in their community, wider society and online), and will know how to avoid or reduce their personal exposure.

People will be able to access training courses and apprenticeships that have made reasonable adjustments to take account of their environmental and communication needs.

Employers will make reasonable adjustments and adaptations to the recruitment process and will ensure appropriate support is provided within the work place.

People will have access to specialist advice and support to help them understand and manage their condition.

People will be supported to improve their emotional and mental health resilience and will recognise personal triggers and have strategies in place to manage the effects.

People will have timely access to assessments and will be kept fully informed of the process and associated timescales.

People will feel safe to share with their immediate support network and others, the conditions (environment, physical and emotional) which could lead to a feeling of being overwhelmed or ‘meltdown’ and will feel confident that if that situation arises appropriate actions will be taken to reduce the intensity and length of the response.
9. Derbyshire (County & City) Adult Autism Programme 2017–20

**What do we need to achieve?**

- Autism act 2009
- Think Autism (2014)
- Statutory Guidance (2015)
- Equality Act 2010
- Care Act 2014
- Care and Support Assessment regulations (2014)
- Transforming Care Recommendations
- Accessible Information Standards
- Safeguarding Requirements
- NICE Guidance CG142, QS51
- Professional standards and guidance

**Where are we now?**

- Derbyshire Autism Health and Social Care Needs Assessment (2011)
- Derbyshire survey of adults living with Autism (2013)
- Regular engagement with self advocates
- Findings from CTR reviews
- Increased awareness across society
- Derbyshire Autism Partnership Board

**How are we going to get there?**

- Improve access to advice, information and training
  - Awareness Raising
  - Staff Training & Skills development
  - Information provision (web & hard copy)
  - Development of Autism Champion Network
  - Community low level preventative support
  - Self Management Support
  - Gaining and retaining employment
  - Specialist Assessments
  - Crisis Interventions and alternative environments
  - Improving access to community MH support
  - Improving Access to assessment
  - Transition into adulthood
  - Youth offending

- Enable people to live well
  - Timely information and advice from one single point of access
  - Improved access to community care assessments
  - Increased social skills and understanding of behaviours
  - Increased independence and self-directed support
  - Increased understanding and management of risk
  - Improved access to education and employment
  - Improved pre-assessment and post diagnostic support
  - Reduced levels of anxiety and depression
  - Reduced assessment times
  - Improved understanding of meltdown triggers

**How will things be different?**

- Preparing for adulthood
- Improved access to education and employment
- Preparing for adulthood
- Timely information and advice from one single point of access
- Improved access to community care assessments
- Increased social skills and understanding of behaviours
- Increased independence and self-directed support
- Increased understanding and management of risk
- Improved access to education and employment
- Improved pre-assessment and post diagnostic support
- Reduced levels of anxiety and depression
- Reduced assessment times
- Improved understanding of meltdown triggers
