TOTAL			
Percentage % Find out how to do this below			

To calculate the percentages, you first need to find out the total number of pupil journeys during the Walk on Wednesday Weeks by:

Number in Class X number of Walk on Wednesday weeks = pupil journeys

Now you can calculate the percentage for the green, yellow and brown leaves on the Walk on Wednesday Tree!

(Green Leaf Total \div pupil journeys) X 100 = %

(Yellow Leaf Total \div pupil journeys) X 100 = %

(Brown Leaf Total \div pupil journeys) X 100 = %

Remember a Green Tree is a Healthy Tree!
